# The *Decorator Series*

The **Decorator Series** is Ferche Millwork's answer to simple sophistication. When a home reaches a certain level of design, it is expected that the mouldings also will have significant thought put into their design, and so, that's what Ferche Millwork has done for you. Each family of mouldings brings you base, casing, chair rail and crown that have been created to match each other.

One look at the base and casing and you know they were meant to be together. The chairrail and crown are derived from the common elements found within the casing and base. The simplicity lies in the fact that architectural correctness is obtained with a single moulding selection. One decision and you're done! What could be easier and more beautiful?
